

Technical Review Board Memorandum

Date: July, 2022

Issue: Seismic Risk Assessment (SRA) Fee Structure

Discussion:

The Memorandum is provided to update the SRA Fee Structure provided in December 2018.

The revised Fee Structure for completing SRA's is as follows:

- \$1,500 for blocks that had previously been assessed through use of the Analyzer (through SPIRs and/or Rapid Assessments prior to SRG3).
- \$3,000 for wood frame blocks.
- \$4,000 for non-wood frame blocks.
- \$5,000 for blocks with more than 4,000 m² space, or for blocks with extraordinary characteristics resulting in added time and effort.
 - The later would require approval from the TRB Steering Committee.
 - Please send details to Phillip Chambers, TRB Manager, at phillipchambersconsulting@shaw.ca.
- \$11,000 maximum fee for elementary schools regardless the number of blocks involved.

Travel costs for areas outside of the Lower Mainland, Greater Victoria and Nanaimo would be added separately from the above.
